PHYSICAL DESCRIPTION: Describe present appearance of structure/site, then contrast and compare that with it's original appearance, noting additions, alterations, and changes in materials. Discuss significant architectural features.

This small square wood frame residence has a pyramid roof, central brick chimney, enclosed eaves, 2/2 double-hung windows, and exposed area above the front door where the porch was attached before moving. There is a wood panel door with rectangular transom. More modern materials include a shed roof addition with wood board and tarpaper siding, asphalt roof shingles, and wood and glass paneled door. The house has asphalt shingles and is on a cement foundation. Outbuildings include: 1. A shed roof board and batten siding, wood board roof old stable with dutch doors, 2. A gable roof outhouse with beveled edge siding, cornerboards, wood roof shingles, wood louvered covered window, 3. A board and batten sided garage with casement hung doors, flat roof, and no foundation.

This is a contributing

INTEGRITY: Assess the degree to which the structure/site, and surrounding area accurately convey the historical associations of the property.  This old mine house is located in a quiet verkingclass neighborhood of older homes, moved in and remodeled. This unremodeled house has excellent integrity of craftsmannship, design, and materials. It is a good example of a representative mine house.  INFORMATION VALUE: Explain how the extant structure/site may demonstrate or yield information about its historic use or construction.
