PHYSICAL DESCRIPTION: Describe present appearance of structure/site, then contrast and compare that with it's original appearance, noting additions, alterations, and changes in materials. Discuss significant architectural features.

This long, narrow, one-story rectangular wood-frame apartment building has a gable roof with projected eaves forming an awning along the front. Other features include: four stretcher bond brick interior chimneys, asphalt roofing, stucco siding, an uncoarsed rough cut rock decorative exterior wainscoating on the front only, four molded wood panels with 3-light doors, along the front, four doors to the rear, with extended eaves awnings over the rear doors, and various size 1/1 double-hung windows. There is a concrete slab porch at each entryway.

The building sits on a stretcher bond concrete block foundation. It was moved to its present site in 1950.

This is a neutral structure.

HISTORICAL SIGNIFICANCE: Justify how the per- and surrounding area lend the property significance.		panomo addocia(eo	with the structure/s
